- Problem analysis and root cause identification
- Customer research
- Competitors and market research
- Identifying a unique solution
- Validating solution's feasibility and defensibility against market & competition

Funding:

- None

Team Size:

- Founding team

Validation

Goals:

- **Validate and eliminate risk factors**
- **Establish first successful contact with market**

Key Activities:

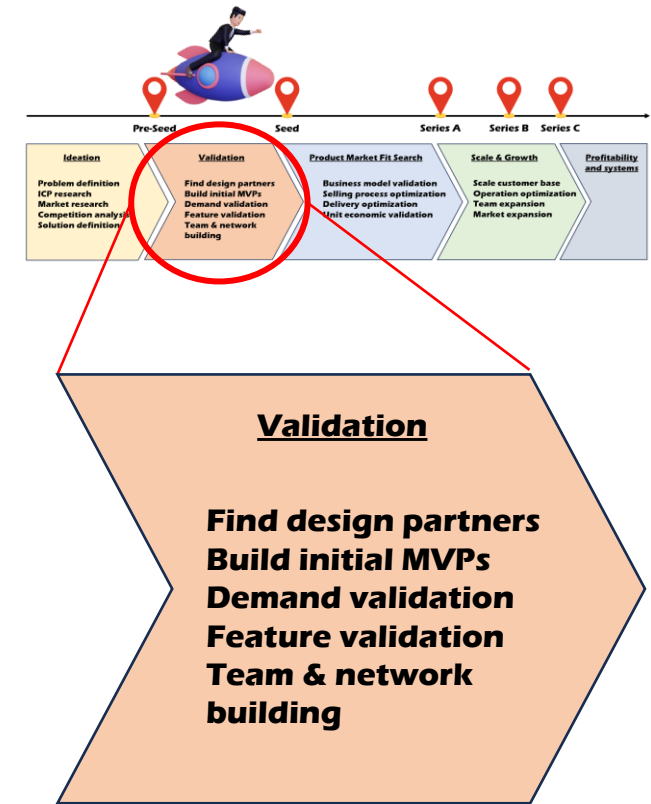

- **Sales**
- **Mockups and initial MVP building**
- **Running product iterations**
- **Networking with founders and investors**

Funding:

- **O(\$100K) in pre-seed funding**
- **Angels, FFF**

Team Size:

- **Founding team**
- **Advisors**
- **Maybe some developers**

PMF Search

Goals:

- **Build a repeatable & scalable system to sell your product in a profitable business model**

Key Activities:

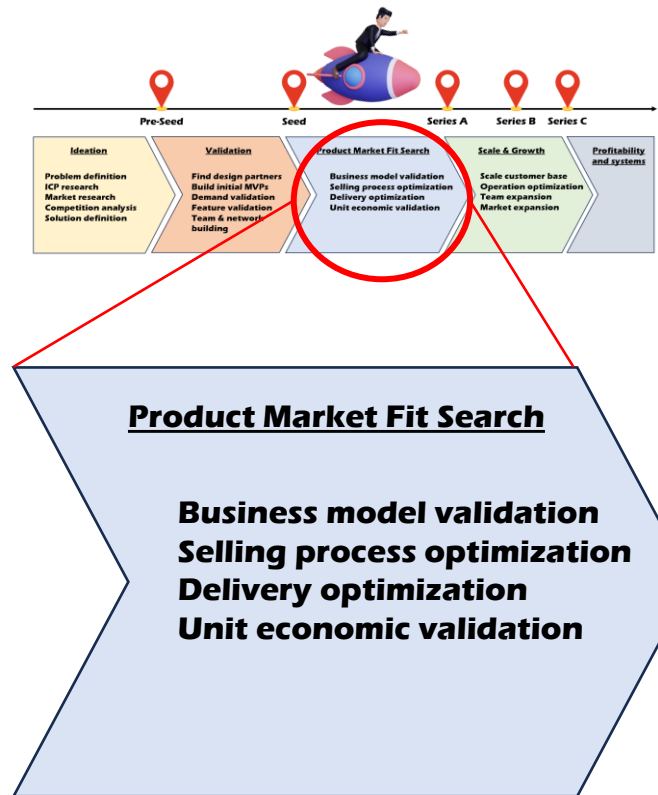

- **Optimizing offer (product, pricing etc.) and business model**
- **Run fast learning cycles**
- **Networking with investors and founders**
- **Marketing and sales**
- **First hiring**

Funding:

- **O(\$1-10M) in seed funding**
- **Early-stage VCs, Micro VCs, Super Angels**

Team Size:

- **Founding team**
- **Advisors**
- **Developers**
- **Marketers and Product**

Growth

Goals:

- **Scale your customer base**
- **Penetrate new markets**
- **Reach profitability**

Key Activities:

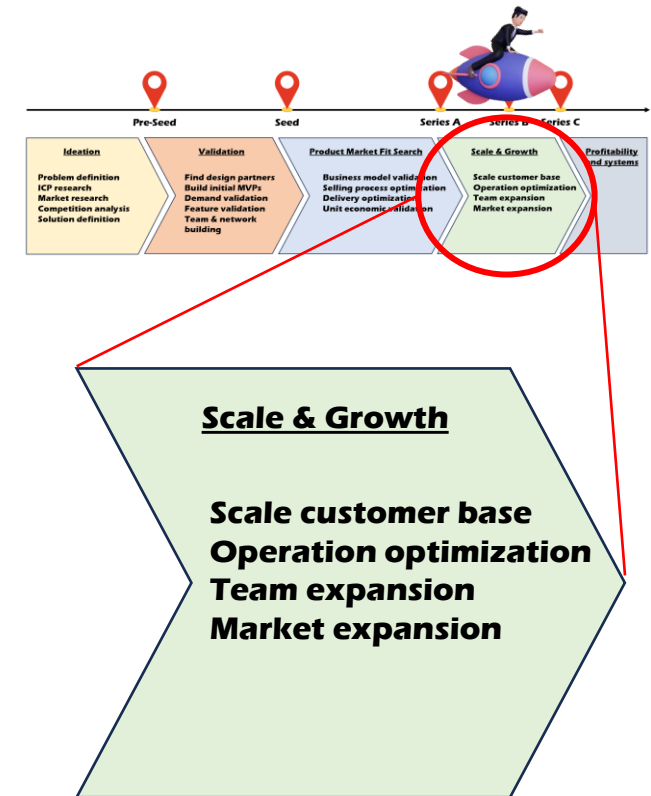

- **Marketing and sales**
- **Hiring Additional team members**
- **Building systems and manuals**
- **Optimizing operations and reaching profitability**

Funding:

- **O(\$10-100M) in Series A & B funding**
- **VCs**

Team Size:

- **Founding team**
- **Advisors**
- **Developers**
- **Marketers and Product**
- **Customer success**
- **Sales**

When to raise your next funding round?

Every founder must know 2 numbers:

- **Burn Rate** – How much does the startup's bank account shrink each month
- **Runway** – How many months until there is no more money in the bank

You should never run out of money (or your startup will die), so knowing these numbers will help you plan ahead for your next funding round.

Example:

Assuming 6 months to finalize a funding round (changes dramatically depending on founders fundraising skills, network strength, industry, round and startup's metrics) you should be well into your funding round 6 months prior to running out of money.

Are you ready?

Did you **hit all the required milestones** to show growth?

Can you demonstrate **traction and progress**?

Do you have a **strong strategic network**?

Do you **know what you need to do** to hit the next milestones?

If you answered **NO to any of the questions?**

**I can help you
get ready for your next funding round
and get the funding you need...**

It's **completely free zoom call where we'll identify what
gaps you still have and build a strategy that will get you
ready for your next funding round**

About the Author

Hey,

I'm Avinoam Kaminski. Father of 3, a serial entrepreneur and an early-stage investor.

I sat on every side of the table (founder, investor, board member, advisor etc.) of the table giving me a unique perspective on the gap between founders and investors.

I've spent years trying to bridge that gap, helping founders better understand what investors want...
